Media Arts and Entertainment Technology

Associate in Applied Science
Fine Arts & Social Science
Office: Mott Memorial Building 2005
Phone: (810) 762-0332

This program focuses on the knowledge, skills, and attitudes necessary to succeed in the fields of video, audio, cinema, web and multimedia production. The curriculum integrates a wide range of pre-production, production, and post-production experiences with the insights offered by media aesthetics, history, theory, and analysis. A heavy emphasis will be placed on the creation of content and messages that are compelling, effective and of substantial quality. Graduates will find a wide range of professional employment, both in Michigan and nationally, including positions in the film industry, at radio and television stations, advertising agencies, production and post-production houses, school systems, non-profits and corporations. Others will transfer to a four year college to further their studies.
